

I am excited to share my plan for the first 100 days in office, which I'm calling "The Moorman Plan":

1. Relationships, Community Building, and Trust Building

Our strength lies in our unity. I will actively engage with you, building strong relationships and trust across our community to ensure that your voices shape our decisions.

2. Fully Evaluate Water Needs

Water is life, and our community deserves the best. I will work diligently to fully understand our water needs and how to address them effectively.

3. Develop a Plan to Address Water and Safety Needs

Once our needs are clear, I will develop a comprehensive plan, including budgeting and appropriating the necessary funds, to tackle our challenges head-on:

- Water, sewer, storm, and streets
- Traffic and public safety

4. Transparency in Government

Your trust matters. That's why I will ensure that audio and video recordings of all meetings are accessible to the public, promoting full transparency in government.

5. Water Loss

We must prevent unnecessary waste. I will address the issue of water loss, securing a sustainable future for us all.

The campaign is over, but the work has just begun. Together, we can make a difference and build a brighter future for our community. Thank you again for believing in me. I am honored to serve you and eager to start delivering results with The Moorman Plan.

Sincerely
Ryan Moorman
